

LeviSelect Immune Cell Kits

LeviSelect™ Kits are uniquely designed to simultaneously enrich for highly viable and specific cells of interest from a mixture of cells using the LeviCell® systems. Immune cell populations can now be enriched gently, producing the highest quality downstream results.

With the LeviSelect Enrichment or Depletion Kits, you can:

- Enrich for viable cell population & remove unwanted cells concurrently
- Maintain target cells of interest untouched
- Reduce sample processing cellular stress factors
- Remove the need for centrifugation and extra wash steps

PART NUMBER	PRODUCT DESCRIPTION	AVAILABLE	EARLY ACCESS KITS
1004001	LeviSelect Human CD45 Depletion Kit	●	
1004003	LeviSelect Mouse CD45 Depletion Kit	●	
1004112	LeviSelect Human Tissue RBC Depletion Kit	●	
1004110	LeviSelect Mouse Tissue RBC Depletion Kit	●	
1004005	LeviSelect Human CD3 T Cell Enrichment Kit	●	
1004007	LeviSelect Human CD4 T Cell Enrichment Kit	●	
1004009	LeviSelect Human CD8 T Cell Enrichment Kit	●	
1004011	LeviSelect Human Pan B Cell Enrichment Kit	●	
1004019	LeviSelect Mouse Pan B Cell Enrichment Kit A	●	
1004013	LeviSelect Mouse CD3 T Cell Enrichment Kit		●
1004015	LeviSelect Mouse CD4 T Cell Enrichment Kit		●
1004017	LeviSelect Mouse CD8 T Cell Enrichment Kit		●
1004027	LeviSelect Human Pan Monocyte Enrichment Kit		●
1004029	LeviSelect Mouse Monocyte Enrichment Kit		●
1004033	LeviSelect Mouse NK Cell Enrichment Kit		●

PART NUMBER	PRODUCT DESCRIPTION	AVAILABLE	EARLY ACCESS KITS
1004025	LeviSelect Human NK Cell Enrichment Kit		•
1004031	LeviSelect Mouse Neutrophil Enrichment Kit		•
1004037	LeviSelect Human CD4 Memory T Cell Enrichment Kit		•
1004039	LeviSelect Human CD4 Naive T Cell Enrichment Kit		•
1004041	LeviSelect Human CD8 Memory T Cell Enrichment Kit		•
1004057	LeviSelect Mouse CD326 (Ep-CAM) Depletion Kit		•
1004110	LeviSelect StreptAvidin Depletion Kit		•
